

MARCIN PASYNCZUK

I am a Junior Java Developer with a strong background in hospitality industry. After concluding my managerial role in March 2023, I shifted focus towards my passion for Java programming. I am also a current student pursuing a Bachelor in Computer Science, studying on weekends and therefore, **available for immediate employment**. I have worked on several Java-based web applications, including my personal website, Hospitoolity and recruitment platform.

Work Experience

Manager in the hospitality industry (London, UK)

January 2017 to March 2023

As a manager in the hospitality industry from 2017 to 2023, I oversaw operations, finances, and marketing. My efforts focused on driving revenue growth, improving efficiency, and fostering client relationships, honing my interpersonal skills in the process.

Education History

Bachelor of Science in Computer Science (2022-present)

Institution: University of Economics and Human Sciences

Expected Graduation: 2026

Courses

The Web Developer Bootcamp 2023

During the course, I managed to deepen and refresh my knowledge and skills in HTML5, CSS, JavaScript and React.

Spring Framework 6: Beginner to Guru

During the course, I gained a thorough understanding of important Spring concepts.

Master Spring Boot 3 & Spring Framework 6 with Java

During the course, I learned how to build real-world applications using Java and advanced concepts of Spring Boot and Spring Framework.

Java Spring Framework 5

During the course, I deepened my knowledge of the Spring Framework and learned how to build web applications with databases.

Java Programming Masterclass

This course covered various aspects of Java. I learned how to write and execute Java programs, use data structures and algorithms.

HTML5 Ultimate Guide 2022

During the course, I learned HTML5, CSS, JavaScript, and Bootstrap in this comprehensive course.

Web Design

In the 30-hour Web Design course, I gained an academic understanding of the process of creating websites.

Skills

Java Technologies:

- Java
- Spring Framework
- Spring Boot
- Spring Data JPA
- Hibernate
- RESTful API
- JSP
- JSTL

Front-end Development:

- HTML (basic)
- CSS (basic)
- JavaScript (basic)
- Bootstrap (basic)

Databases:

- Workbench 8.0
- Docker (basic)
- MongoDB (basic)
- H2

IDE:

- IntelliJ
- Eclipse
- Atom
- Visual Studio Code

Testing:

- JUnit
- Mockito

Version Control:

- Git

Projects

Personal Website (www.marcinpasynczuk.com)

- Key tools used: Java, Spring Boot, JSP, HTML, CSS, JavaScript.

My personal website. I've developed to highlight my skills, accomplishments, and portfolio.

Recruitment Platform with easy GUI for recruiters

- Key tools used: Java, Spring Boot, Spring Security, Spring MVC, JSP, JSTL, HTML, CSS, Bootstrap, Workbench.

MealmarJobs is a platform where job seekers can explore latest job vacancies, apply directly, and contact companies for inquiries. On the other hand, it provides recruiters an easy-to-use interface for managing applications, verifying CVs, and directly communicating with candidates.

Hospitoolity (www.hospitoolity.com)

- Key tools used: Java, HTML, CSS, MongoDB, JavaScript, Vue3, Tailwind

This website provides an efficient solution for hospitality businesses to manage their HACCP plans, aiding food safety and UK regulatory compliance. It protects business reputations, prevents legal issues, boosts customer trust, and optimizes operations by saving time and resources on data management.

Organizer 2.0

- Key tools used: Java, Spring Boot, Spring Security, Spring MVC, JSP, JSTL, HTML, CSS, Bootstrap, JPA, MySql (Docker).

Organizer 2.0 is a Java/Spring Boot web app that manages daily tasks, events, and appointments.

Casino Games

- Key tools used: Java

I have utilized my knowledge of Java programming language to create exciting and engaging casino games such as Black Jack and Slot Machines.

Soft Skills

- Analytical thinking,
- Detail-oriented,
- Strong communication,
- Problem-solving,
- Leadership,
- Interpersonal skills,
- Adaptability and ability to pivot quickly to meet changing needs in the constantly evolving industry,
- Time management.
